

# Teddy Bear Learning Center

A child's curiosity of the natural world is the essence of learning!

## Summer Adventure Program

### The Wonder of Science

Learning comes alive as our children explore the captivating world of science. Whether observing birds at a bird feeder, watching a stormy sky, or studying the amazing lost world of dinosaurs, our summer science program promises to spark our young scientist's imaginations. Sample topics include dinosaurs, butterflies, flowers, worms, magnets, thunder, and lots more.

### Ocean In Motion

Our adventure begins with pirates and a map of hidden treasure. Our children's eyes sparkle as they collect, count, sort, and chart the precious objects they find. As our journey continues, we sail across the ever-changing sea and discover the extraordinary life under the waves. Our voyage concludes on a tropical island where we explore the shore, the sand, seashells, and palm trees, and enjoy a beautiful summer day on our beach.

### Spotlight on the Arts

We round out the summer with a focus on creativity. Song, dance, drama, and poetry light up the children's faces as they sing, recite, dance, sway, and simply have fun while they are introduced to many exciting and creative works. Imagination abounds as children display their art work made with crayons, chalk, paint, paper, glue, and other materials. A pallet of colorful learning is in store for each child as we explore all the arts.

**Call 732-747-8583 for more information**

Our fun-filled summer programs allow for ample time to play in our large shaded school yard or to relax and cool off in our bright, beautiful, air-conditioned classrooms. Parents may enroll for a two-week session this summer, a whole summer of fun, preschool for the fall, or a year-round program. We are pleased to accept children from birth through 6 years and children need not be toilet trained.
